To Whom It May Concern

As a resident of Lockport Township we are in support of Lockport Township opposing the following proposed legislation that is being proposed by District 82 Michigan State Representative Kristian Grant:

- Request # H05153'23
- Request # H05154'23
- Request # H05539'24
- Request # H06034'24
- Request # H06017'24
- Request # H06281'24
- Request # H05162'23
- Request # H05675'24
- Request # 06252'24
- Request # 06267'24

We concur with Lockport Township that these zoning type regulations should be under the authority of the local municipality in accordance with the desires of local property owners, not cookie cutter legislation that is not compatible with all areas of the State of Michigan and to which could have extreme negative impact to local communities throughout the State of Michigan.

We concur that there is a housing shortage in the State of Michigan, but dispute that the cause of such shortage is due to local zoning regulations.

We also believe that changes to the Michigan Residential Building Codes, and the Michigan Building Codes should be determined by experienced professionals that are appointed to the State of Michigan Licensing and Regulatory Affairs office and such regulations are based on solid research for life safety reasons, and not based on political reasons.

Respectfully Submitted,

Lockport Township Resident
